

About Replicon

Proven and Reliable

Founded in 1996, Replicon is the world leader in web-based time and expense tracking, time-off tracking, and resource scheduling software.

Replicon's products deliver incredible ease of use and phenomenal user adoption rates, raising it well above the competition. It provides users with seamless integration into a multitude of leading payroll, accounting and productivity management software.

Our productivity solutions:

- provide organizations with visibility into project costs and status
- facilitate cost allocation and charge backs
- accelerate billing cycles
- enhance profitability with a single solution
- track duration and frequency of employee time off
- provide an overall snapshot of resource allocation and employee scheduling

Replicon delivers easy to use and quick to implement web-based solutions for companies of all sizes and since 1998 has grown its total user base to more than 6700 customers worldwide.

"I am very impressed with your software and your company. Your sales support was excellent. Technical support is very responsive. Implementation was a snap. The software is very flexible and meets the needs of our business very well. Bravo!"

*- David Vliet, Vice President,
AQUAResource Inc.*

Customer service

Replicon is dedicated to providing unparalleled service to our customers. A team of support experts help customers solve the problems that they are facing at all levels of their business.

Replicon's productivity solutions are simple and intuitive to use requiring little to zero training. However, if you need training, Replicon's highly trained professionals can get your users up to speed quickly with in-house classroom or tele-training programs.

Replicon continues its quest in "Operational Excellence" by systematizing key areas and focusing more on efficiency.

Today, Replicon can boast that its software is "the easiest to acquire, install and use."

Our Pride

*- Mike Mansell,
Cameron Engineering*

Our Software

Replicon is the established market leader in project-based timesheet and expense management. Deployed in minimal time, Web TimeSheet is a completely web-based application that automates the essential processes that drive project-based organizations.

Web TimeSheet Project & Billing Edition allows users to track time against projects, enter billable and non-billable time, and compare expected revenue to the total cost of the project.

Web TimeSheet Time & Attendance Edition allows users to track time off, adjust payroll based on overtime calculations, and set up limits for minimum or maximum time submissions.

Web Expense allows users to manage employee expenses and track reimbursements.

Web Schedule allows users to create and modify employee work schedules.

Web Resource is a simple, easy-to-use project and resource scheduling tool, designed to optimize your workforce through resource tracking, skills management, and resource and project forecasting. With Web Resource, you can add unlimited resources, allocate these resources to projects and tasks, and view the results either on screen or in printed reports. The bi-directional integration with Web TimeSheet saves time by allowing you to import/export your existing projects, tasks, and resources.

Instant Deployment with SaaS

Replicon provides Software-as-a-Service (SaaS) from data centers in North America, Europe, and Australia, ensuring quick, reliable, and secure access from anywhere in the world. Our customers are able to implement their Replicon solutions quickly, without the hassle of purchasing expensive hardware or installing software on their end.

Below are just a few of the benefits you'll experience with Replicon's Software-as-a-Service:

- Quick Implementation - no software, no hardware, no installation
- Automatic upgrades to the latest features
- Fast, reliable access through multiple data centers in North America, Europe, and Australia
- World-class security to protect your data (SAS70 compliant)
- 24/7 support to get the help you need when you need it

Quick Implementation

Replicon's award winning user interface makes each product quick to implement and easy to use. Many of our customers have been able to go live with their Web TimeSheet solutions within a very short timeframe – anywhere from a few hours, to a couple of days – and with minimal or no training. Our high user adoption rate minimizes the risk many companies face when deploying new software, and offers a quick return on investment.
