REPLICON™

CloudClock

Make time collection easy and deter time theft with Replicon CloudClock

Replicon CloudClock gives organizations the flexibility to combine the powerful Replicon TimeAttend software with the mobile tablet device of their choice for an intelligent, cloud-connected time clock solution.

" Replicon was better than any other time and attendance solution we looked at. With SaaS, people can do timesheets from client locations, or wherever. "

Lolalisa Decarlo King, Director of Business Operations and Administration, The Principle Partnering Group

Using Traditional Time Clocks is Inefficient and Risky

The traditional time clocks of the past are complex and expensive to set up and use for time tracking. Servicing these hard-wired devices is inconvenient, and repairs can take days. Designed for basic time capture with no integration capabilities, many organizations feel locked into using these devices because they don't evolve as most businesses typically do. What's more, a lack of configurability means that these devices cannot flexibly adjust to labor rules and policies, which can result in compliance issues.

Even worse "Buddy punching" is easy with these mechanical time clocks, resulting in time theft that affects about 75% of businesses in the US and can add up to 7% of a company's gross payroll annually. Buddy punching has been a common practice, because the clunky traditional clocks had no ability to identify who clocked-in—the employee or a friend. To overcome "buddy punching," organizations have had to rely on poorly designed, hard to use, difficult to configure and maintain devices which are very costly and require too much time to get installed.

Track Employee Time with Accuracy and Efficiency

Replicon CloudClock takes the headache out of tracking employee time with an easy-to-use, all-in-one solution. It gives organizations the flexibility to choose the mobile tablet device that they want to download the time clock on. Also, it is inexpensive, flexible, and easy to deploy, which means managers don't need to go through too many approvals or too much effort to get it implemented.

Combined with Replicon TimeAttend, CloudClock minimizes payroll errors and ensures labor compliance with easily configured business rules that automatically calculate the correct pay amount for each employee and apply the right attendance policies. What's more, you need not worry about maintaining the infrastructure or security of the CloudClock, or dealing with any upgrades, because it all happens automatically and seamlessly in the cloud.

Get started immediately

Getting started with CloudClock is easy. Simply download the app on your mobile tablet device and start tracking time and attendance immediately, without the need for any training, thanks to its intuitive user interface.

Eliminate buddy punching

Eliminate the risk of buddy punching with a photo audit trail of employee punches.

Streamline time off management

Leverage CloudClock's dual-use as a self-service kiosk which empowers employees to submit time off requests, view their balances, and more.

### Simplify maintenance and upgrades

Enjoy the benefits of around-the-clock monitoring and maintenance, automatic upgrades, and 99.5% uptime—Replicon detects and fixes potential problems before customers notice.

> " Timesheets are in a lot sooner, and very few people have any problems getting them done. "
>
> **Jim Fournier, Managing Director, Solutions Atlantic**

CloudClock works seamlessly with Replicon TimeAttend* to provide a comprehensive time tracking solution
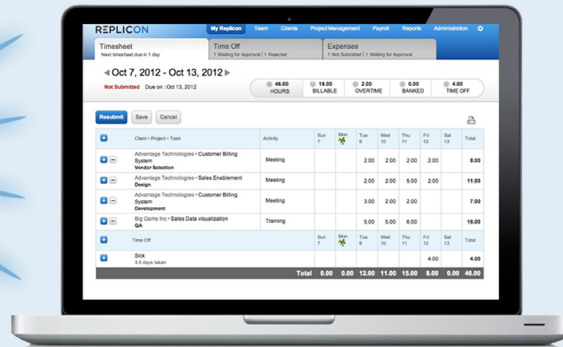

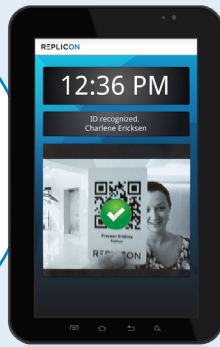

Support for different shifts and employee types with the same device makes it a cost-effective, versatile solution

The photo audit capability maintains a photographic history of employee "punch-ins," eliminating buddy punching

Self-service capabilities for employees to conveniently request time off and view their past and future time-off bookings

Ability to transfer employee time to different activities or departments

Robust security ensures users only see information that is relevant to them

Enjoy real-time visibility into time and attendance data using TimeAttend's **advanced reporting** capability
